Building a world where everyone can move around without fear, specially women

'FIND SUPPORT' LAUNCH

ARE YOU OR IS SOMEONE YOU KNOW FACING VIOLENCE?

FIND SUPPORT ON

MY SAFETIPIN APP

One click and find the nearby police stations, one stop crisis centres, shelters, NGOs and state commission offices!

In view of the rise in violence against women, especially during the pandemic, **Safetipin has launched a new feature on the My Safetipin app** for women facing violence or abuse. The feature provides a list of centres where women can seek aid. They include police stations, police stations with women-only units, one stop crisis centres, NGOs, shelters and state commission offices. The compiled data is verified by our team and is provided per state. To download the My Safetipin for free, click on the icons for the Google Play Store and Apple App Store respectively.

Download on the **App Store**

GET IT ON **Google Play**

To understand more about the feature and our motivation behind developing it, read the 'Find Support' report on our website (www.safetipin.com).

To view it, you can click on the image on the left.

'Find Support'

A new feature on the My Safetipin App to help women in distress

SAFETIPIN
Supporting Safer Cities

Using Safetipin Tools to make Durban Safer

In Durban, data collection using My Safetipin App has begun in two localities of KwaMashu and KwaNdengezi by volunteers of Gugu Dlamini Foundation and Ethembeni Crisis Centre respectively. Additional data will be collected on Taxi Ranks using Safetipin Site app, a newly developed application. This app is used to collect specific information in public spaces on custom-built questionnaires. The female volunteers would assess the taxi ranks in terms of women's safety and accessibility. This data would then be shared with our partners Soul City Insitute and the project stakeholders; National Taxi Association, SA and eThekwini Municipality to work on creating safe transport for women.

Mapping Safety in Malaysia with Safetipin Tools

In collaboration with Think City organisation, Safetipin will begin mapping in Greater Johor Bahru area using Safetipin Nite app. In addition to image collection, information on prominent public spaces will be collected through questionnaires. Hosted on Safetipin Site App, the questionnaire will be developed to assess accessibility, safety and inclusion at selected public spaces.

Presenting at World Bank Webinar

Safetipin presented our work on safe mobility for women at an event organised by World Bank in Bogota on Women's Safety in Public Transport. As all events are now online, we participated virtually sharing how Safetipin tools have been used to measure women's safety and access to mobility, focusing on some cities where safety audits have been conducted including Delhi, Hanoi and Colombo.
